Tuesday being a vainy day some of the members of the Eureka Club met at the club house and served dinner.

An Christmas tree and entertaining program will be given in the 12th district school Thursday evening Dec.

The Most Suitable Gift Possible Would Be That New Reo The Fifth She Has Wished For So Long

FOR SEVERAL REASONS this will be not only the ideal Christmas gift, but this is the ideal time to buy a Reo.

FOR ONE THING—though you need not let on to her!—you will derive just as much pleasure from it as she will. Not more—that would be impossible.

ANOTHER REASON IS that you have been promis-ing for a long time to sell the "old boat" and get her a new car-one that will be more in keeping with her social position, her needs and her tastes.

AND YOU KNOW that of all the cars that are made, she prefers Reo the Fifth-for she can drive it herself. Many of her woman friends drive Reos and they've told her, of course, of its wonderful simplicity of control "just like an electric," and of its dependability.

THAT ABSOLUTE FREEDOM from the "peaky little troubles" that vex most motorists, and which are so distasteful-so unthinkable-to a woman driver, makes Reo the Fifth the first choice of the most discriminating buyer.

THE THIRD REASON has to do with the secondthat is, the selling of the "old boat," to advantage.

DOUBTLESS YOU'VE LEARNED that you can get more for your old used car yourself than a dealer can-so it's really folly to "trade it in."

THE IDEAL TIME to sell a used car is in January or February—just when the big spring rush is setting in-when all good, desirable makes of cars are so hopelessly over-sold it is impossible to get immediate delivery for "love or money" and when a "trade in" is almost out of the question.

BUYERS ARE HUNGRY then for any old kind of a car-but dealers are hungry only for new ones.

THEN'S THE TIME to advertise your used car, sell it for cash, and realize more for it than you can possibly do by trading.

OH, OF COURSE YOU MIGHT get what looked like a liberal allowance for it in trade for some unknown mbled" or "orphan" car. But experience has proven to you that that's just one way of short changing yourself.

SUCH A CAR is dear at any price—if you could make an even trade still you'd get the worst of it-as you'd find when the upkeep and repair bills came in.

IF THE OLD CAR IS A REO of course you'll get a larger percentage of its original price in a trade but in any case, you'll get more by selling it direct

SO THE THING TO DO is to buy her that new Reo now-let us drive it over and leave it in front of the house next Monday morning, so the first thing her eyes will light on as she looks out at the Christmas day will be the thing she has most desired a brand new, shining, spick-and-span Reo the Fifth.

THEN NEXT MONTH, or a little later as soon as the spring sun peeks out-sell the old car at the "spring" price.

YOU'LL BE OUT the difference only a few weeks at most-and the difference in price you'll get then will be a handsome interest on the money.

AND MEANTIME you'll have the use of the new car and an enclosed Reo the Fifth is especially lunurious at this season.

WHAT SAY?-Shall we polish up her Reo and drive it over Christmas morning? We will if you'll drop in today and pick it out.

THERE ARE FOUR TYPES of bodies obtainable on Reo the Fifth chassis. The "Incomparable" fivepassenger touring car; the classy, graceful, threepassenger roadster; and the new all-season touring car and roadster. Prices are \$875, \$875, \$1025. and \$1025, respectively, and freight from the factory.

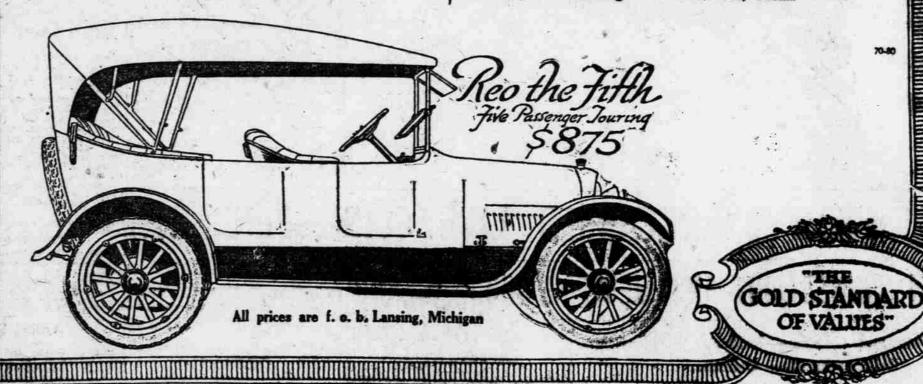

P. S.—OF COURSE IF TOO MANY doting husbands or fathers or brothers act on this suggestion, we may not be able to deliver all the Reos Christmas morning "in the flesh." In that case a certificate of acceptance of your order will suit her almost as well-and better than anything else. And we'll tell her precisely when she may expect her Reo-freight service alone excepted. For, you know what that is most uncertain. However, if you are one of the first, we will fill the order promptly.

Champlin's Act a Surgrise.

The arrest of Charles Champlain on Tuesday charged with the setting of the fire which destroyed two carloads of paper stock early Sunday morning on the spur track at the Versailles station, came as a surprise, not only to C. H. Phillips, employer of Champlin as teamster, but to a large number in this vicinity for Champlain had seemed of a quiet nature and disposition. The bouring of both cars was acknowledged by Champlain. Champlin's Act a Surprise.

plain.

It is thought that a car of paper stock destroyed last July on the spur track at Versallies may have been from the same cause. Several cars and buildings had a narrow escape from burning Sunday morning; among the cars was a loaded car of finished goods of the Sanitary Fibre Mills. The rain of the night before helped in the saving of the nearby buildings.

Idaho a Big State.

To those of us who remember Idahe in our school geographies as a small pink block, shaped like an easy chair facing east, it may be of interest that this state which in 1980 added the forse, or on an of of the six New England states with Maryland included for good measure. It is divided into 33 counties, the smallest of which is half as large as the state of Rhode Island and the largest greater than the combined area of Massachusetts and Delaware.

Idaho covers an area of 83,888 square miles, divided principally between the Rocky Mountain region and the Columbia plateau, only a small part, in the southest corner of the state, lying in the Great Basin. In elevation above sea level the state ranges from 735 feet at Lewiston, to 12,873 feet, at the summit of Hyndman Peak. It is drained mainly to the Columbia through Snake river and its tributaries and has an annual rainfall of about 17 inches, the range in a single year at different places being from 6 to 38 inches. The industries of the state are chiefly agriculture, stock raising, and mining. Hay, wheat, oats, and potatoes are the principal crops. The area is cultivated by irrigation. The mineral production includes gold, afiver, copper, lead and zinc. The output of lead in 1912 was valued at \$12,986,866, that of Idaho in 1910 was \$25,924. Overland Guidebook, Bulletin 612, U. S. Geolgoical Survey.)
